INTERCONTINENTAL FLIGHTS NEW WORLD-CLASS CABINS

We are updating the interior of our long-haul fleet with new seats, new entertainment system and WiFi access. Our Airbus A330/A340s are gradually having cabin upgrades and four additional brand-new Airbus A330 Enhanced aircraft will be added to the SAS fleet as of May 2016.

The interior design is ultra-modern with greater cabin comfort in the shape of new seats in all classes. To make flights even more comfortable, a new entertainment system with HD large screens is being installed along with WiFi access.

The materials and color scheme in the new cabins have been selected to create a welcoming and relaxing atmosphere, with new mood lighting introduced throughout. The seating in SAS Go and SAS Plus is designed with good storage to create extra space.

All seats in SAS Business will now have direct access to aisles and can be folded flat for maximum comfort. The bedding comes from Hästens, the oldest bed manufacturer in Sweden, to ensure that passengers enjoy a high-class sleeping experience.

SAS
