Copa Airlines announces the launches of Dreams and Economy Extra Business Class

As of **June 1, 2021**, Copa Airlines will offer highly differentiated service from its Hub of the Americas in Panama to four important destinations in its route network. The airline seeks to **offer a superior experience**, based on two fundamental elements that enhance the level of its world-class service: comfort and convenience.

Copa Airlines passengers traveling between Panama and **Montevideo (Uruguay), Buenos Aires (Argentina), Sao Paulo (Brazil), and Los Angeles (United States)** will be able to enjoy the Dreams Business Class on all flights, which features 16 comfortable **reclining bed-type seats**, large 16-inch remote-controlled touch screens with an extensive entertainment program, AC and USB power outlets and storage space for personal items.

The Economy class will feature the **Economy Extra** section, located at the front of the cabin, consisting of 24 seats with increased legroom, individual 10-inch touchscreens with USB input, and AC power connectors - for passenger convenience.

All passengers aboard these aircraft will be able to enjoy the variety of content provided by the **Copa Showpass wireless entertainment system**, which can be accessed by connecting to the aircraft's intranet network from a computer or mobile device. Using Copa Showpass, travelers will be able to access a wide range of movies, television series, magazines, documentaries, and music.

With Dreams Business Class, Economy Extra and Copa Showpass, Copa Airlines seeks to meet the needs of its passengers on these important long-haul routes, which require a more comfortable experience.

As the airline takes delivery of new aircraft, it will expand this offering to more destinations in the Americas to continue offering its travelers the world-class service for which it is renowned.
