**About Change of Minimum and Maximum
Quantity of Excess Baggage Pieces
(FOCC LOCC)**

TO: Agents of Siberia Airlines, PJSC

Dear Colleagues,

Siberia Airlines, PJSC, does hereby inform that it changes the scheme of minimum and maximum excess baggage pieces indication (FOCC LOCC) for S7 XBAG Charges in FSB screen starting from July 21, 2015.

Starting from July 21, 2015, minimum and maximum excess baggage pieces in FSB screen will be indicated as follows:

- **FOCC=1 LOCC=1** – first additional bag in excess of the free baggage allowance;
- **FOCC=2 LOCC=** – second and other additional bags in excess of the free baggage allowance (with no maximum limit);
- **FOCC= LOCC=** – a bag within the free baggage allowance which does not comply with all the requirements of this free baggage allowance.

Let us draw your attention that **FOCC= LOCC=** is already used for pet carriage charges irrespective of the passenger's bags quantity, as well as for weight concept charge per one (1) kilo. This remains unchanged.

Necessary changes to technological documentation will be made in working order.

Actual excess baggage charges are published in GDS. Use FSB format to view the changes in Gabriel ABS.

The following remains unchanged for completing ENDO field when issuing EMD/EBT:

- **1PC** – one (1) bag (up to 23 kg and 203 cm);
- **OW** – over-weighed bag;
- **OS** – over-sized bag;
- **OSOW** – over-sized and over-weighed bag;
- **AVIH** – animal in hold;

- PETC – pet in cabin.

If you have any technological problems, please, contact Technology and Training Department via email tech@s7.ru or call +7 383 222 3135.

Best regards,

**Mr Ruslan Vereshchagin,
Siberia Airlines, PJSC**
