Update on seat selection for customers with infants

Last Update: 02-07-2026

Customers traveling with infants in the Business cabin on Air France long-haul flights can now select seats in advance for a fee. All customers traveling with an infant in the same booking may choose standard Business seats, with or without a bassinet (BSCT), or select Business Suites, at a discounted rate. Infants may travel on the lap of an accompanying adult.

Standard Business seat selection is free of charge for customers:

- Holding Flex fare tickets.
- Traveling from a point of commencement (PoC) in the United States, Canada, Mexico, and Papeete (PPT), to an IATA-defined European destination.
- With a Flying Blue Silver, Gold, and Platinum status, and for SkyTeam Elite and Elite Plus members.
- With a Delta SkyMiles Elite and Elite Plus status.
- Corporate customers (except bluebiz), groups, and customers with reduced mobility, subject to applicable conditions.
- During the check-in window.

Flying Blue Ultimate members continue to benefit from complimentary advance seat selection for the Business Suite option.
